Sir:

Applicants thank the Examiner for the courtesy extended during a telephone interview between Examiner Thomas and Applicants' representatives on April 24, 2007. In the interview, the applied art (US 2004/0101649, Thoma) was discussed. The Examiner maintained the position that the board "3d" of Thoma constitutes an insulating material in an interspace between two adjacent boards. Possible amendments to the claims were discussed, but agreement with respect to the claims was not reached. The Information Disclosure Statements submitted in this application were also discussed. Should there be any questions, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,  
Joachim HASCH et al.
